

Right Networks' Roman Kepczyk Earns Robotic Process Automation Certification

HUDSON, N.H (April 5, 2019) – Roman Kepczyk, an industry leader in technology education and Director of Firm Technology Strategy at Right Networks, recently earned the Robotic Process Automation (RPA) Certificate developed by the AICPA and CIMA for accounting and finance professionals.

“Rapid advances in big data analytics, robotic process automation, and cognitive programming capabilities are invading the traditional CPA space at an accelerating pace,” said Kepczyk. “I felt it was important to get a thorough understanding of both the technological and practical applications of RPA tools so we can proactively leverage them to the benefit our clients.”

To obtain the credential, Kepczyk successfully completed courses in: Understanding Robotic Process Automation; Building an RPA Business Case; Implementing RPA; Governance, Risks and Controls for RPA; Organizational Process Implications for RPA; Audit and other Services for RPA; and Trends and the Future of RPA.

Widely recognized for his expertise and passion for the practical application of technology advances, Kepczyk will facilitate the “[Data Driven Automation Panel](#)” at AICPA ENGAGE 2019 in June.

Kepczyk was named as a CPA Practice Advisor Top Thought Leader for 2019 and has made *Accounting Today's* annual list of Top 100 Influential People 13 times. He has also been listed as one of INSIDE Public Accounting's Most Recommended Consultants for 13 years.

About Right Networks

Right Networks helps accounting firms, independent accounting professionals, and small businesses move their legacy accounting software and business-critical applications to the cloud. Right Networks is 100% accounting focused and offers an industry-leading platform that hosts and maintains legacy accounting software alongside a curated application ecosystem of 250+ best-in-class applications, including QuickBooks, Lacerte and ProSeries from Intuit, Expensify, Bill.com, Avalara, SmartVault and Webgility. By providing critical, time-consuming application updates and back-ups and zero scheduled downtime, as well as 24/7 tech support and enterprise-class security, Right Networks customers achieve the flexibility that is critical to serving their clients and/or running their business.
