Reduce risk - minimize human error and improve security

Agility

Grow your AP as fast as you need to

- Apply your own unique workflows
- Keep tight control over cash flow
- Pivot easily into new opportunities
- Stay lean and responsive at scale

Bill.com is the trusted leader in AP automation

Partnering with Bill.com provides a turnkey automation solution for your AP. It doesn't require special training to use, and most companies are ready to pay their first bill in just a few minutes. Here's how it works.

Automatic invoice capture

Email an invoice directly to the app, or snap a photo on your phone, or scan it and drag it to your inbox. Your Intelligent Virtual Assistant, IVA, reads and enters the data for your review, checks for things like duplicate invoice numbers, and flags any issues.

Streamlined approvals

Set up your own unique workflows with as many rules as you need. Bill.com finds the right rule for each transaction and sends the invoice to the right people automatically. Approvers can even handle those approvals on their phone.

Cloud-based, digital invoice management

Check the status of any bill from the easy-to-use Bill.com dashboard. If approvers have questions, that's easy too. Every communication is stored with the invoice itself, so you don't have to dig for what you need.

Multiple payment options

When you're ready to make a payment, send an ACH, virtual card, international wire, or even a paper check, all from the app. Bill.com will print and mail that check for you without any need for a manual signature.

QuickBooks integration

Bill.com integrates with QuickBooks to link key data in both systems. Everything stays up to date, so reconciliation is easier than ever.

Ultimate transparency

Every invoice touchpoint is stored in a time-stamped audit trail. With the visibility and transparency that Bill.com provides, you'll know every procedure was followed and every invoice and payment was properly accounted for.

Enhanced security

Bill.com is designed with your privacy and security in mind at every level — application, payment, network, and data — from our encryption and cipher suites to the payment protections that are built into the way the platform operates.

Bill.com and Right Networks partner together to provide customers the ease and value of a one-cloud experience while helping to automate AP processes.
