

Right Networks

Cloud Premier

Specifically Designed for the Needs of CPA Firms

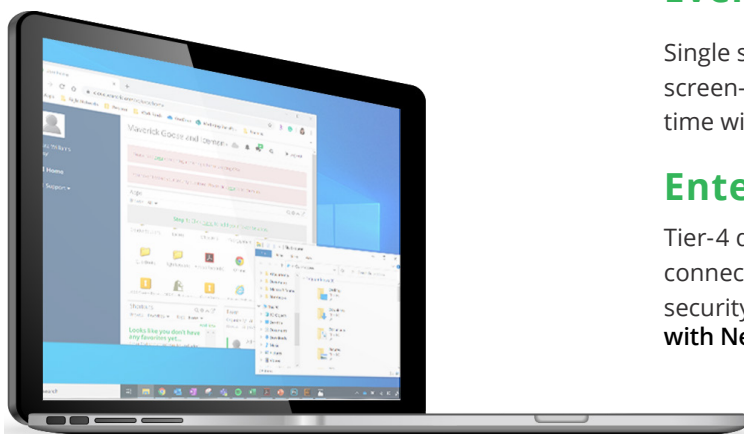

As a CPA—you're busy:

- Strategizing, planning, and leading your firm.
- Ensuring communication methods between clients and staff are flexible, seamless, and secure.
- Remaining up-to-date on tax laws and in compliance with the IRS and FTC Safeguards.
- Monitoring and ensuring software and applications are updated, and hardware systems are working as needed.
- Hiring, onboarding, maintaining staff and...
- Being a CPA.

Luckily—we get accounting and IT.

- A turn-key managed IT service, complete with a dedicated team assigned to keep systems available, secure, and scalable so you can focus on what matters: your clients.
- Over 2,500 accounting, tax and related business apps supported. Pick the ones that best fit your firm.
- Rest easy knowing we handle all software updates and security patches for you.
- Unparalleled US-based support, including an assigned technical team led by a dedicated Client Success Manager, available 24/7/365.

Keep your business thriving with the only solution that combines accounting and tax application expertise with managed IT.

Everything in one place.

Single sign-on brings you to your firm's applications—all on one screen—and in-portal messaging allows you to chat securely in real-time with co-workers.

Enterprise-level security and reliability.

Tier-4 data centers, 99.995% uptime, 24/7/365 threat-detection, connectivity monitoring, and more—all managed by a dedicated security resource team. **Plus the option of advanced virus detection with Next Level Security.**

We're the market leader in cloud-based accounting solutions for a reason.

- A solution solely focused on CPA Firms for the last 20+ years has allowed us to master best practices for accounting and tax applications.
- We make working-from-anywhere at anytime possible—improving client service levels, reducing overhead costs, and alleviating capacity constraints.
- The capabilities of the Right Networks Cloud Premier platform makes it ideal to support CAAS practices.
- We implement a change freeze during tax season; we won't make significant changes to the portal or schedule major project deployments during your busiest time of the year.
- Our support team only services accounting and tax firms, so you're always speaking to someone well versed in industry-specific workflows.
- Partnerships with accounting industry leaders means we know what's on the forefront of software enhancements, and our system will be ready to support it.

"Right Networks has an unparalleled understanding of the accounting industry and the unique needs and innerworkings of our firm."
