

Your cybersecurity **risk** has never been greater

The average total cost of a data breach in the U.S. increased from \$8.64 million in 2020 to \$9.05 million in 2021¹ and 81% of CISOs state that “staying ahead of attackers is a constant battle and the cost is unsustainable”.²

With the cost of a data breach rising and threats ubiquitous—what can be done?

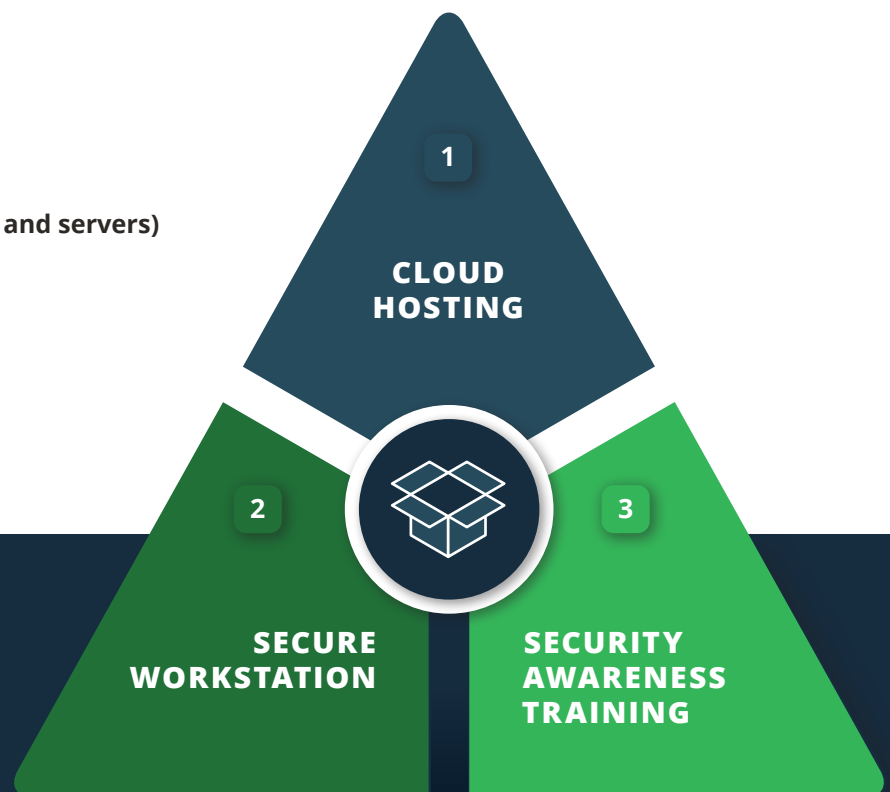

Research shows that companies can better prepare to mitigate cyber threats when multiple layers of defenses are in place.

- **Cloud security:** Work from a cloud environment to protect hosted applications, software and data.
- **Endpoint security:** Ensure all endpoints (laptops, desktops, servers) have enterprise-grade security that is correctly installed, maintained and up to date.
- **End-user protection:** Educate all your employees on an ongoing basis with training and testing to help mitigate the most likely source of cyber-intrusion—human error.

Mitigate, educate, detect

Achieve holistic security in three steps:

- 1 Work from a cloud environment
- 2 Protect endpoints (laptops, desktops and servers)
- 3 Educate employees

Committed to data protection inside and outside of **the cloud**

A business-oriented platform to mitigate the threats accounting firms and professionals face.

Secure Cloud Hosting

Secure and reliable cloud hosting that safeguards your data with end-to-end redundancy across all systems, real-time data replication and enterprise-class multi-layer security systems—24/7/365.

- Tier 3 and 4 data center storage
- Automatic daily backups
- Multi-factor authentication included

Secure Workstation

A comprehensive, secure endpoint solution to safeguard your business-critical data. Get peace of mind with additional security for all your employees with one enterprise-level solution.

- 24/7/365 threat-detection
- Leading encryption technology
- Dedicated security resource team

Security Awareness Training

An employee education program providing best practices for staying safe online, plus 24/7/365 dark web monitoring.

- Fully managed and supported
- Curated for accounting and finance professionals
- Maintains compliance with required annual security training
